

ONE-PIECE FAN
VP4L

The VP4L one-piece 9 blade nylon fan was designed to achieve high static pressures with low power consumption. It is engineered primarily for cooling packages with little space in off-highway vehicles and agricultural/industrial machines.

ONE — PIECE
FAN-SYSTEM

Blade number	Blade Angle	Blade Length	Hub Length	min. fan diameter	max. fan diameter
9	28°	260mm	204mm	304mm	724mm

Construction Machinery

Compact Power Generator

Portable Compressor

Agricultural Machinery

Very compact dimensions and low power consumption.

High performance and efficiency.

Take advantage of the high static efficiency (low power consumption), combined with lower production costs for one piece fans. Save fuel and reduce emissions!

Blade material
PAG
